"Knowing Where To Go"

Getting to know the notes on the neck
(estimated learning time: 10-15 minutes)

This is without doubt, one of the single most important things you need to know if you really want to play guitar all over the neck well!

It is a little boring, but... It will literally help you more than anything I know of when it comes to playing guitar!

Do NOT take this lightly! Even if you are already an advanced player, take five minutes each time you pull your guitar out and pound this into your brain. You'll thank me for it later. *I promise!*

Just learn the E string and you can use it to help you on all the other strings. That one string (12 simple notes) holds the key to some great things we'll be covering!
