Note From Jerry In The Studio...

This is a perfect example of getting more out of what we already know!

The gray notes show us the A Blues Chord.

The green notes show us another way to play an A Blues chord but using the D Blues Chord Shape (or finger placement).

This is very powerful information. Make it sink in and move it around on the neck.

Our number 2 finger tells us what basic key we're playig in.

Shown examples are in the key of A.

** As in the video lesson, you can slide this D Blues chord shown at the 12th fret (referring to the #2 finger) up two frets and you're in B.
