

“Get Your Groove” The Scale Monster

Confused? Watch the video one time!

Open String Note

	Fret	#1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22 ...	
E																								
B																								
G													2		1									
D											6,8		5,7	4	3									
A											10		9,11											
E																								

REPEAT
Same as open

First step...
Play through the red notes as shown. The numbers indicate the order to play them.

Next step...
Play through the red notes and when you get to the 11th note (an A), replace it with any of the other A notes shown as a green diamond.

Feeling good? Try replacing the starting A (shown as 1) with a different version of the note by using any of the other A's shown as a diamond.

“Get Your Groove” The Scale Monster

(estimated learning time: 30 minutes)

Note From Jerry In The Studio...

This may look odd or difficult but working this out will give you an enormous amount of coordination skills and cause you to move around the neck on “auto-pilot”.

DO NOT GET FRUSTRATED!

After you have mastered the instructions shown above, practice finding replacement notes for other notes/numbers. Example, you could replace the #10 note using the #2 note.

Why? The answer to that is super easy... It's the “Gimme Note” or octave note. Remember, all you have to do is go up 2 frets and down 2 strings to get the “Gimme Notes”.

Look at it close. It will click easier than you think!
