Note From Jerry In The Studio...

This is a killer of a pattern that develops serious coordination and provides some very interesting setups for licks and phrasing.

Don't forget to insert the add-on notes shown in green. The notes shown are the setup for the basic Pentatonic Minor.

Just play around with it. Work it in the opposite direction from the bottom string. 14,13,12... etc.

Remember... Apply this to “Going Country Not” and as always... Run it through “The Triple Factor”.
