The Diamond has a very interesting sound. Even though it's making the same notes we'd play in the normal Pentatonic Minor, it's shape causes natural skipping of notes and this creates some very unusual sounding licks.

The Diamond also creates coordination growth for your fingers and your mind. Get it down and you'll be amazed at all the new ideas you'll have for solo's, licks, and song lines.

Tap... Touch...Or Play... 12 frets up the neck!
